PROJECTS

Technical Blog

- My personal tech blog which i post a technical news. I used wordpress to manage the posts, comments and all content, full responsive design using bootstrap with preloader, cards, breadcrumb and Font Awesome. [↗](#)

Pynch | Realtime Chat App

- Graduation project, very simple to sign up, log in and chatting with your friends, fully-responsive design and dynamically using JavaScript, PHP & MySQL. [↗](#)

Website Landing Page

- Landing page for educational website: (University of Gezira), responsive design using bootstrap with preloader, navbar, carousel, news gallery and awesome dark footer. [↗](#)

Random Quote Generator [↗](#)

- Random Quote Generator used to generate random quotes. To show random quotes, I used a free API named "quotable", TTS (Text To Speech) functionality and writeText() property with a fully-responsive design.
